CAREER OBJECTIVE

To contribute as a Full-Stack Developer by applying knowledge in ReactJS, ExpressJS, Spring Boot, and Cloud services to create reliable applications, improve team outcomes, and help achieve organizational goals.

ACADEMICS

- B.Tech, Computer Science and Engineering** **CGPA: 9.57/10**
KL University , Vaddeswaram 2021-2025
- Board of Intermediate Education, Andhra Pradesh** **Marks: 973/1000**
Sasi Junior College , Palakollu 2019-2021
- Board of Secondary Education, Andhra Pradesh** **CGPA: 10/10**
Narayana E-Techno School , Razole 2018-2019

EXPERIENCE

- AICTE - AWS Cloud Virtual Internship** ,(Dec 2022 - Feb 2023)

PROJECTS

- Bookrary - Bookworm Haven**, (Oct'24-Nov'24) **-GitHub**
- A digital platform for book enthusiasts to curate personal libraries, track reading progress, and manage collections and locate books by keywords, title, genre, or publication date.
-**Technologies and frameworks used** - ReactJS, Redux , ExpressJS ,CSS3 and MySQL.
- DealsBlendr - E-commerce Price Comparison System**, (Aug'23 – Oct'23) **-GitHub**
- Developed a dynamic system that integrates with multiple e-commerce data to retrieve and aggregate electronic product data. The system compares prices across platforms in real-time, ensuring competitive pricing and aiding informed purchasing decisions.
-**Technologies and frameworks used** - Spring Boot ,ReactJS, CSS3 and MongoDB. **-View**
- Cloud Voting - Voting System**, (Feb'24-Mar'24) **-GitHub**
- Built a secure, cloud-native voting application that allows authorized users to cast votes. The system focuses on ensuring user authentication and access control.
-**Technologies and frameworks used** - ReactJS, CSS3, AWS .
- LinkSpace - Social Media Application**, (May'24-Present) **-GitHub**
-Currently in the final stage of developing a social media platform with key features including user connections, chat functionality, and content sharing with friends.
-**Technologies and frameworks used** – ReactJS , FireBase Authentication & Database. **-View**

SKILLS

- Languages** - Java , JavaScript , C
- Web Development** - HTML , CSS , ReactJS , Redux Toolkit, NodeJS , ExpressJS
- Databases** - MySQL ,MongoDB
- Cloud Technologies** - AWS
- Others** - GitHub ,Agile methodologies , Collaborative work, Adaptability & Team Player

CERTIFICATIONS

- Frontend Developer(React)** **-<https://bit.ly/HRank-FE>**
- AWS Cloud Practitioner** **-<https://bit.ly/AWSCP-sai>**

RESEARCH WORK

- Secure Encryption Frameworks Analysis** – A comparative study of encryption algorithms like HSS-RSA, ERSA, Homomorphic Encryption, Blowfish, AES, and HECC, focusing on their effectiveness in data security.
